PRODUCT DESCRIPTION

Designer: Piero Lissoni

Flos Camouflage LED 140 Outdoor Wall Light

The Camouflage 140 Wall Light is ideal for any outdoor setting or works equally well indoors as a minimal wall sconce. Flos manufactures the wall lights in 10 different finishes that will match any material or background when you install them, and each finish is made with a completely different process, allowing for more versatility. The integrated LED light source is projected onto the surface behind the product, providing impactful indirect illumination.

The Flos Camouflage 140 allows you to personalise the colour temperature, offering warmest white (2700K), warm white (3000K) or cool white (4000K) depending on where you decide to display it. The IP65 rating allows the Camouflage 140 to be utilised in indoor settings but also bathrooms, wet rooms or even exterior locations. This makes Camouflage perfect for your garden, walkway or entrance to your home as well as in commercial locations.

Please Note: the driver for this light is not contained within the light itself. The driver [RF25748] can be installed in a housing unit [F1318000], which is included in the price. Remote driver installation is also available. Please contact us for more information.
