Flos Bellhop LED Wall Light

The Flos Bellhop Wall Light is a versatile indirect lighting solution, available in 5 colour options. Designed by Edward Barber & Jay Osgerby, the Bellhop can be installed all around the house and, thanks to the IP65 rating, in bathrooms and exterior settings. The wide colour choice allows you to select a finish that matches perfectly with your interior or exterior decor and colours. The hidden LED light source is projected against the wall and reflected back out, granting diffused and glare-free illumination.

The Bellhop LED Wall Light by Flos is available in a choice between three colour temperatures from 2700K (warmest white) to 3000K (warm white) or 4000K (cool white). The aluminium and stainless steel structure renders it ideal for outdoor settings, while at the same time, the diffused light adds warmth to your home.

The Bellhop wall lamp is also available in a dimmable version, using either 1-10V or Dali dimming systems, upon request. Please contact us for further information and pricing.
