PRODUCT DESCRIPTION

Designer: Francisco Gomez Paz

Bulbullia LED Wall Lights by Luceplan

Bulbullia by Luceplan adds an organic feel to any space. Designed by Francisco Gomez Paz, it gives out a soft light which is reflected towards the centre of each polycarbonate cone by the in-built dimmable LEDs, enhancing the matte finish of the reflector.

The Bulbullia wall light has a highly decorative impact which is characteristic of delicate soap bubbles – appearing soft yet also geometric in design. With the Bulbullia, Luceplan and Paz have created the possibility of forming unique and original designs by freely grouping multiple Bulbullia lamps together. Each element contains a dimmable LED spreading soft light, creating a relaxed atmosphere in any living space.

The Bulbullia wall lamp is available in two sizes: 3 or 5 elements.
