LE KLINT

Pliverre Pendant by Le Klint

A part of the [Le Klint Pliverre collection](#), the Pliverre pendant light is a reinterpretation of a typical Le Klint shade with a new material, opal glass. The opal glass adds a touch of luxury to the pendant and results in an elegant and timeless light. While the quality and characteristics of the glass shade is the same as the folded shades in plastic and paper, it also creates a perfectly diffused and glare free warm light.

Available as a singular purchase or as a set of two, the Pliverre pendant has small brass detail and a black cord, making the Pliverre a minimalist design that definitely catches the eye in every room. The light also comes with an adjustable cord, meaning you can choose what height you would like the pendant to hang at. This pendant light is especially beautiful when installed in clusters or creating a linear setup above the dining table. You can also match the pendant with the [floor](#) and the [chandelier](#) to create a seamless lighting scheme.

Designer: Christian Troels

Dimming: Dimmable via mains phase dimming

Dimensions:

Ø8.5cm shade

30cm shade length
