HAY

PC Single wall light by HAY

Joining HAY's PC collection by Pierre Charpin is the PC Single arm wall light, a precisely engineered luminaire which provides focused light exactly where it's needed. This design features gas springs which enable the lamp to stay exactly where it has been adjusted to, there is also a touch dimmer which has a memory of where it was previously dimmed to. The PC wall light has been installed with clever LED technology, creating a perfectly designed task light for home or commercial offices, it is customisable to the user's needs. The lamp will also turn off after 5 hours to prevent electricity wastage.

PC wall light collection has been designed to be sleek, smart and modern with a high-quality satin effect finish.
