PRODUCT DESCRIPTION

Designer: Pierre Charpin

HAY PC Pendant Light

The HAY PC Pendant Lights were designed by Pierre Charpin, whose lighting designs are often described as being “more sensual than technical”. This philosophy is reflected in the refined form of the PC Pendant, where the light source is discreetly concealed within an anodised aluminium shade and removable translucent polycarbonate diffuser. The result is a smooth, uninterrupted silhouette with a clean and cohesive appearance, designed to be read as a complete whole.

When illuminated, the moulded diffuser softens the light, creating a gentle and even glow that brightens the surrounding space without glare. Practical, user-friendly, and visually understated, the PC Pendant is well suited to both residential interiors and workplace settings. Available in a range of finishes and sizes, it offers versatile design possibilities, while Charpin’s careful use of colour helps unify the different materials and elements into one elegant, balanced design.
