PRODUCT DESCRIPTION

Designer: Astro Design Team

Astro Dunbar 255 LED Wall Light

The Astro Dunbar 255 LED Wall Light is a clean, contemporary wall light designed to cast illumination both upwards and downwards. Its strong architectural form and integrated LED light source make it a practical choice for exterior walls, entrances, patios and pathways, while also allowing it to work well in selected interior settings where a more robust fitting is needed.

Rated IP65, Dunbar 255 is suitable for outdoor use as well as bathroom zones 1, 2 and 3, making it one of the more versatile wall lights in the Astro collection. The dual light output helps create both functional illumination and ambient effect, adding definition to vertical surfaces without relying on an exposed lamp.

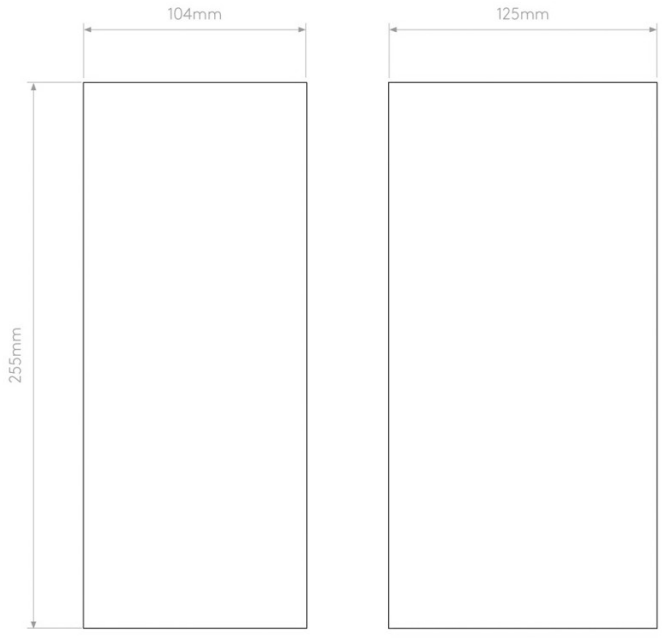

Available in a textured black finish, Dunbar 255 includes an integrated LED light source with a 3000K colour temperature and is designed for wired installation. Made from aluminium and suitable for a wide range of residential and commercial applications, it offers a neat, durable solution for spaces that need dependable wall lighting with a restrained modern look.
