PRODUCT DESCRIPTION

Designer: Le Corbusier

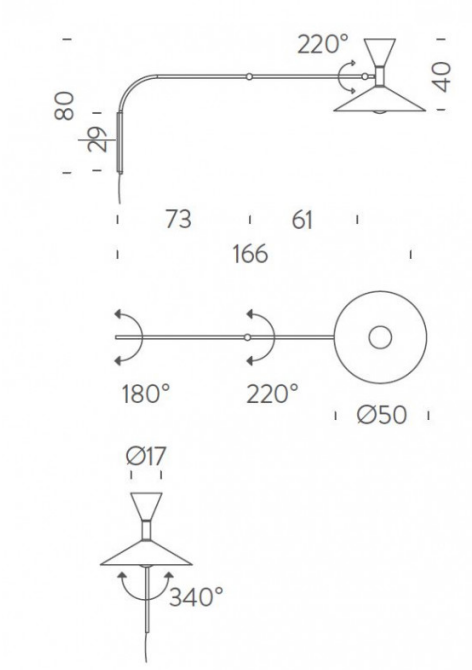

Nemo Lighting Lampe de Marseille Wall Light

Originally designed in 1949/1952 by Le Corbusier for the Unite d'Habitation in Marseille, a housing development principle. The Lampe de Marseille is adjustable at two points or joints along the arm as well as a rotating wall fixture. As such, you can fully adjust and direct the light in any direction you wish making it the perfect task light. Lampe de Marseille is also available in a mini version, and the light comes in matt grey, whitewash or a black finish option. The internal diffuser is white for all the colour options. With two light sources, an upper and lower, the Lampe de Marseille emits both a downlight and an uplight.

The Lampe De Marseille Wall Lamp comes with a cable & plug, where you have to install the light near a socket, but it can also be hard-wired and connected to the mains by a qualified electrician.
