PRODUCT DESCRIPTION

Designer: Bernhard Osann

Bird Table Lamp by Nemo Lighting

Bernhard Osann designed a one of a kind table light for Nemo, a minimalist and discreet design, a luminaire with a counterweight. Bird is a light that sits - and balances - on the edge of any surface. The light has an amazingly narrow width, at merely 1.2 cm the Bird is equipped with a linear LED strip along its length, emitting diffused, both direct and indirect light. Bernhard is known for creating designs by bending and twisting metal rods and form these unusual but stunning lights.

The Bird light ihas a body made of extruded aluminium and a T-shaped support to balance the light. The upper part of the body is in black and the lower, functioning as a counterweight, in brass. The LED module is actually adjustable and allows you to rotate and change the direction of the light. Bird is also dimmable, with the on/off switch and dimmer functioning through a proximity sensor. To switch on/off the light by quickly running your hand over the sensor, or stay above the sensor to dim the light.

PRODUCT SPECIFICATION

Light Source:	10W, 2700K, 715 lumens
IP Code:	20
Dimming:	Integrated dimmer included on product (proximity sensor).
Dimensions:	86 cm height 94 cm depth 1.2 cm width 2m cable length
