### PRODUCT DESCRIPTION

**Designer:** Benedetta Tagliabue

### Bover Domita S/20 decentralised pendant lights

Designed by Joanna Bover, the Domita S/20 Decentralised Pendant takes its inspiration from the 2015 iconic Dome pendants. Due to the popularity and versatility of the Dome's design, it only made sense to expand the collection into a smaller variation. It is also an evolution of the Domita S/20 Pendant.

The Bover Domita S/20 Decentralised Pendant is handmade and formed up of multiple wooden slats that, when combined, create a diffuser around the light source. This wooden diffuser ensures a glare free light emission and a beautiful shadow effect when the lamp is illuminated. Domita S/20 Decentralised Pendant is very versatile, it boasts a neutral colour pallet and it's understated size ensures it makes an eye-catching display, no matter if you choose 4 or 7 light sources. The design is ideal for social areas such as living rooms or dining rooms where Domita can create the most impact.

**This collection comes complete with a standard central brown ceiling canopy, cable lengths can be adjusted on-site to suit the requirements of the room.**

**The decentralised version is also available in a 13 & 19 drop version, please [contact us](#) .**

### PRODUCT SPECIFICATION
