Astro Trimless Square Fire-Rated Recessed Light

Astro Trimless Square Fire-Rated Recessed Light is a square recessed ceiling light for interior and bathroom use, supplied with both black and white bezels so the visible finish can be adapted to suit the room. It must be installed before the final plaster skim, giving a clean trimless finish once the ceiling is complete.

The square shape gives the fitting a more architectural look than the round Trimless version, but it still sits neatly once plastered in. Its IP65 rating means it can be used in bathroom zones 1, 2, and 3, including shower areas, as well as kitchens and other ceilings that need a protected recessed fitting.

The Trimless Square is wired in, dimmable depending on the lamp selected, and requires no separate driver. It is fire-rated to 90 minutes, and the terminal block can only be accessed from above. This product must be installed before the final plaster skim. Most suited to bathrooms, shower areas, kitchens, hallways, and interior ceilings where a square trimless recessed light is required.
