Astro Can 50 Single LED Spotlight

The Astro Can 50 Single LED Spotlight is a compact surface-mounted spotlight with a clean cylindrical form and a contemporary, architectural feel. Designed for both ceiling and wall mounting, it offers a flexible lighting solution for a range of interior settings, whether used for highlighting artwork, illuminating shelving or providing focused light in kitchens, hallways and living spaces.

Can 50 Single features an integrated 8.2W LED light source with a 3000K colour temperature and a high CRI of 90, producing a warm, accurate light that works well in both residential and commercial interiors. The spotlight can be tilted by up to 90° and rotated by 330°, allowing you to direct the beam precisely where it is needed. Available in matt white or matt black, it can either blend into the surrounding scheme or add a stronger visual contrast.

This LED spotlight is dimmable using leading-edge and trailing-edge dimming and does not require a separate driver. Rated IP20, it is suitable for indoor use and can also be installed in the bathroom zone 3. Made from aluminium and suitable for mounting on flammable surfaces, Can 50 Single is a practical and versatile option for directional lighting.
