Astro Bayville Spike Spot Light

The Astro Bayville Spike Spot is a flexible exterior spotlight designed to illuminate gardens, pathways and outdoor architectural features. Mounted on a sturdy spike, it can be easily positioned in the ground to direct light exactly where it's needed, from highlighting trees and shrubs to creating dramatic uplighting effects. With an IP65 rating, it is fully protected against the elements, ensuring long-term reliability in all weather conditions.

Its integrated 8.2W LED delivers 467 lumens at a warm 3000K, striking a balance between functional brightness and atmospheric outdoor lighting. The adjustable head tilts up to 90° and rotates 330°, giving complete freedom to alter the focus of the beam. This makes it a practical solution for accentuating landscapes, garden paths or driveways, with dimmable functionality via phase dimming for further control.

Available in textured finishes such as black or grey, the Bayville Spike Spot combines subtle design with robust aluminium construction. With its sleek profile and flexible positioning, it is well-suited for residential gardens as well as hospitality or commercial landscaping projects.
