Astro Borgo 55 LED Recessed Light

The Astro Borgo 55 LED Recessed Light is a slim recessed wall light designed to deliver subtle, low-level illumination in contemporary interiors. Finished in matt white, it has a clean, understated appearance that allows it to sit neatly within the wall, making it especially well-suited to staircases, corridors, and other transitional spaces where discreet architectural lighting is preferred.

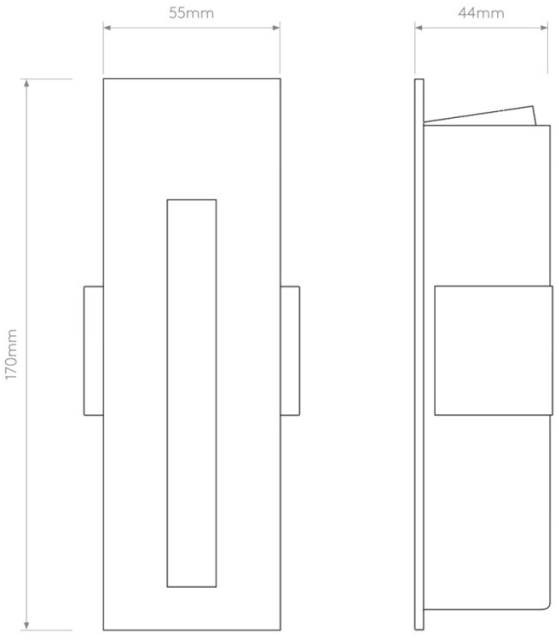

Borgo 55 features an integrated 2W LED light source and is available in both 2700K and 3000K colour temperatures, allowing you to choose between a warmer or slightly crisper tone depending on the setting. Its compact vertical format makes it ideal for guiding movement through a space, while the IP20 rating also allows it to be used in bathrooms, strictly within zone 3.

This recessed wall light requires a constant current 700mA driver and is dimmable when used with compatible control gear. An optional back box for solid wall installation is also available, making Borgo 55 a practical solution for projects that need compact, minimal and well-integrated accent lighting.

Please note, requires a 700mA constant current driver, not included. Drivers differ depending on how many lights you want to install and whether you need them to be dimmable or not. Please contact us for more information and pricing.
