PRODUCT DESCRIPTION

Designer: Joan Gaspar

Marset Jaima LED Outdoor Floor Lamp

Marset Jaima LED Outdoor Floor Lamp is an IP65 floor light by Joan Gaspar, named after the Bedouin tents of North Africa and their use of fabric. The Textilene shade has a white interior and sits on a tall stainless steel structure with an extensible carbon fibre stem. Its fabric shade filters the light while allowing the form to move more naturally than a rigid metal shade.

Jaima comes in three floor configurations. The smaller P207 uses the 43 shade, while the taller P307 can be paired with the 54 or 71 shade. The stems can be extended and the structure rotated, allowing the shade to be positioned above a table, outdoor sofa, or seating area rather than sitting directly over the base. Blue, Beige, and Grey shades are available across the range, with Green also offered for selected Jaima 71 configurations.

The integrated LED gives warm 2700K light and the floor lamp is IP65 rated for outdoor use. Standard dimming is via Triac, with an optional IP65 Casambi dimmer available for wireless control through the Casambi app. Most suited to patios, terraces, garden seating areas, outdoor dining tables, poolside lounges, restaurants, hotels, and exterior spaces where a large fabric shade can bring warm light over a seating or dining area.

Please Note: An optional IP65 Bluetooth Casambi dimming option is available for wireless control through the Casambi app. 3000K versions are also available on request. The connection adapter has an IP20 rating and should be positioned accordingly during installation. Please contact us for more information and pricing.

PRODUCT SPECIFICATION

Light Source: **Jaima P207 + Shade 43:** 15W, 2700K, 528 Lumens
Jaima P307 + Shade 54: 15W, 2700K, 513 Lumens
