PRODUCT DESCRIPTION

Designer: BIG

Louis Poulsen Keglen LED Pendant

The Keglen LED pendant light has been designed in collaboration between BIG Ideas and Louis Poulsen. The idea behind the Keglen pendant was to create a light that has the same details and qualities across sizes and colours, whilst also maintaining unique traits. This pendant is characterised by its lovely conical shape and built-in diffuser, which is also conical, resembling a drop of water hiding in the lampshade. Each pendant emits a soft glow in a completely individual way, with the diffuser helping to create a nice ambience.

The Keglen pendant light produces a downward light from an integrated LED bulb, making it perfect for hanging over tables in dining and kitchen areas or as a feature light in lounge areas. The pendant also has an opening in the top, allowing for a soft upward light to emit, creating a seamless transition between darkness and light in your space. Use as a singular light or as part of a cluster using different sizes and colours to create a real impact. Wonderful in both home and commercial settings, the Keglen LED pendant will look classic yet contemporary in your space.

This pendant is also available as a DALI dimmable compatible light with an integrated LED source in a 2700K or 3000K light temperature. Please contact us for more details.
