PRODUCT DESCRIPTION

Designer: Arne Jacobsen

Louis Poulsen AJ Royal LED Pendant

Originally released with a halogen bulb, the Louis Poulsen AJ Royal Pendant has been updated, fitted with a diffuser and an energy-saving integrated LED light source. This release celebrated the 60th year since the opening of the Royal Hotel in Copenhagen, which was designed entirely by Arne Jacobsen from the structure to the furniture. The AJ Royal LED Pendant was an integral part of the building, looking beautiful lined up in dining and lounging areas.

The AJ Royal Pendant is distinguished by its rounded shape and the intriguing slanted lines on top, which allow for light to be emitted upwards as well as downwards. The pendant has a soft downward glow, which is perfect for creating ambience and with the ability to dim using a suitable wiring system, the AJ royal pendant light will help you create the perfect atmosphere. This pendant light is truly versatile and can be used for both home and commercial spaces. To create a real impact, mix and match different colours and sizes to cluster together or use as a singular feature light.

This pendant is also available with DALI dimming, as well as an integrated LED source with a 3000K light temperature. Please contact us for more information and pricing.
