PRODUCT DESCRIPTION

Designer: Andrea Tosetto

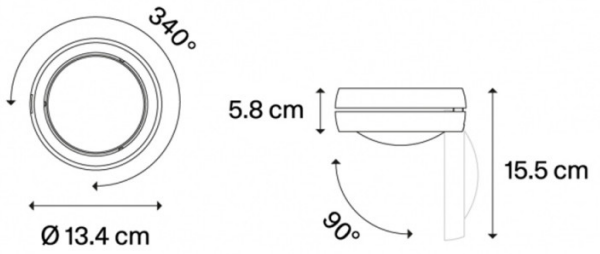

Lodes Nautilus Ceiling Light

Designed by Andrea Tosetto, the Nautilus Ceiling Light is characterised by its domed lampshade and metal structure. The lens can be adjusted up to 90° and rotated 340° on its axis. This versatility allows users to direct light precisely where needed for a truly efficient and personalised result. The convex lens projects a bright beam of light, bathing the surrounding surface in a warm glow. Perfect for either functional lighting or a decorative glow, the Nautilus Ceiling Light suits a wide range of settings.

The Nautilus Ceiling Light features an integrated LED light source, available in either 2700K (warmest white) or 3000K (warm white) for the perfect colour temperature for the surrounding space. Available in three sleek finishes Matte Black, Matte White, and Matte Champagne, this contemporary fitting can be installed in both residential and commercial settings. With a space-saving design, the Nautilus Ceiling Light has been created to be installed in multiples, lining the length of a hallway, in a gallery to showcase pieces of art, or in pairs to frame a doorway.
