PRODUCT DESCRIPTION

Designer: Andrea Tosetto

Nautilus Ceiling Light by Lodes

Designed by Andrea Tosetto, the Nautilus ceiling light is characterised by its domed lampshade and metal structure, being modern and contemporary in look. The lampshade is adjustable and can be opened up to 90° from its position when flush to the ceiling and the shade can be turned on its axis 340°. This allows you to direct the light where you need, being versatile enough to use in a variety of big or small spaces, whether you want to create a spotlight or ambience.

The Nautilus ceiling lamp comes with a built-in LED light source, making it energy-saving, and you have the option between a 2700K (warmest white) or 3000K (warm white) colour temperature to get the right fit for your room. The ceiling light is also dimmable giving you even more control over your lighting scheme. Available in 4 colours, this functional and stylish ceiling lamp can be matched with other lights from the Lodes Nautilus collection to create consistent décor in your interior.
