PRODUCT DESCRIPTION

Designer: Andrea Tosetto

Nautilus Mini Wall Light by Lodes

A part of the [Lodes Nautilus collection](#), the Nautilus Mini wall light is a nifty, useful light that can be used in both small and big spaces. Like the rest of the collection, the Nautilus Mini wall lamp is moveable, being able to move up and down and rotate on its axis up to 355°. With both an upward and downward directed light, this wall light creates a big, diffused glow that will light up the room effectively.

The movability of the wall light means you can direct the light where you need and the built-in LED light source, makes it long-lasting. The wall lamp is available with either a 2700K (warmest white) or 3000K (warm white) colour temperature and is dimmable, giving you control. Available in 3 subtle colours, this LED wall light will slip smoothly into any existing décor and will be effective but not intrusive in style.
