PRODUCT DESCRIPTION

Designer: Andrea Toso

Valentina Table Lamp by Lodes

Designed by Andrea Toso, the Valentina table lamp is part of the [Lodes Valentina collection](#). The lampshade is distinguished by its crystallised design, diffusing the light and creating reflections in a playful way. The base is then finished in polished colours, making the table lamp luxurious and stunning.

The Valentina LED table lamp is available as both a corded and cordless light. The **corded** version comes with an on/off switch and is not dimmable. This version is more suited as a permanent fixture in a lounge, bedroom or dining area to create a warm atmosphere due to the 2700K (warmest white) integrated LED light source.

The **cordless** version is a dimmable, portable lamp that can be used in a wide variety of settings, inside or outside on a dry day. **Please note this lamp is not suitable in the rain or other extreme weather.** The cordless table lamp comes with a micro-USB charger cable and once fully charged, can last between 6-17 hours straight depending on setting. The cordless lamp has a touch dimmer switch, which allows you to either control the dimmer continuously or on a 3 step setting. The LED light source can be dimmed from 3000K to 2600K (warm white to warmest white), so you can use colour temperature to match the natural lightness you experience throughout the day, a proven benefit for mental health and wellness.

The Valentina table light is a gorgeous lamp that is fashionable and striking and with two versions and 5 colours available you can choose the right fit for your space.
