LIGHTING STORIES

Marlene Pendant Light by Prandina

Designed in 2010, the Marlene pendant is made from opal white glass, blown into a stylish design that has sleek lines and a simplistic aesthetic. The design of the pendant makes it very versatile and functional as it can be used in many settings both domestically and commercially. The lampshade both diffuses and directs the light as the glass creates an atmospheric glow and the design means the light directs downwards, perfect as a spotlight for the room or over tables.

The Marlene pendant light is available in 3 sizes, the Small S1, S1 and S3, meaning you can find the right size for your space. You could also buy several to put in rows or mix and match to create a lovely, eye-catching cluster. This pendant light is both elegant and classic, the perfect choice for your space.

This pendant is available in an integrated LED light source version. Please [click here](#) to find out more.
