Marset Bolita LED Table Lamp

Marset Bolita LED Table Lamp is a plug-in table lamp by kaschkasch, made with a steel base and an opal blown glass diffuser. The lamp has a low, rounded form, with the LED set into the base and the glass sphere resting over it. Rather than using a normal switch or touch control to change the light level, Bolita is adjusted by moving the glass diffuser by hand.

As the diffuser moves across the base, it changes how much light is covered or revealed, creating an eclipse-like effect. This gives the lamp a more physical way of dimming the light, making the action of adjusting it part of the design. Bolita works well on a bedside table, shelf, side table, coffee table, or low cabinet where a small, softly diffused lamp can sit close at hand.

Bolita is supplied in a White finish with a black cable and an integrated LED. The switch is positioned on the base, and the opal blown glass diffuser softens the warm light from the LED. Most suited to bedrooms, living rooms, shelves, side tables, bedside tables, lounges, hotel rooms, and interiors where a compact table lamp can provide soft light with a simple interactive control.

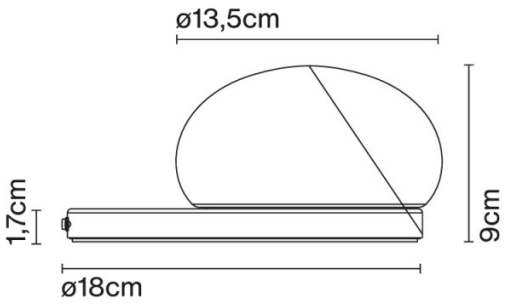

PRODUCT SPECIFICATION

Light Source: 7.2W, 2700K, 157 Lumens

IP Code: 20

Dimming: Integrated dimmer on the product.

Dimensions: Shade: Ø13.5cm
Height: 9cm
Base: Ø18cm
Cable Length: 150cm
