Marset Bolita LED Table Lamp

LA10245

PRODUCT DESCRIPTION

Bolita LED Table Lamp by Marset

A new and innovative design by kaschkasch for Marset, the Bolita table lamp is an interactive and interesting light. The included LED light source is diffused by an opal glass shade, which creates a warm, glare-free glow perfect for creating ambience. The shade can be moved along the metal base allowing you to adjust the light and also dim the light by physically touching the table lamp. This makes the table light very user-driven, bringing you back to the product in a time where technology is so often controlled by one touch on a screen.
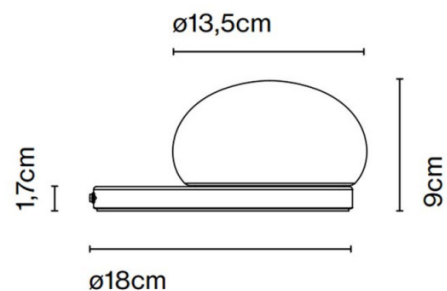

The interactive nature of the Bolita table light makes it unique and forward-thinking. The glow that emits is wonderful for atmospheric lighting and can be used for this in bedrooms, lounges, dining rooms and many more spaces. The curvaceous design and simplistic aesthetic make in modern and chic and will be a stunning addition to any room.
