PRODUCT DESCRIPTION

Designer: Antoni Arola & Enric Rodríguez

Vibia Bamboo Double LED Outdoor Floor Lamp

This multi-stem floor light has an organic and streamlined design, inspired by the perennial bamboo plant. A Vibia exterior light designed by Antoni Arola and Enric Rodriguez, the Bamboo lights become a beacon of light for your home or business. The Bamboo double floor lamp features a short and a long cane, available in two sizes with integrated LED sources. The light is emitted with a downward inclination, illuminating a pathway or highlighting any features of the exterior landscape.

The **small 4810** comes with five LED light sources and the **large 4811** comes with seven LED light sources, so you can find the right size for your outdoor space. The Bamboo double floor light is available in an off-white, oxide or khaki colour finish which means it can be camouflaged and integrated into its surroundings due to the subtle hue. The built-in floor light can be mixed and matched with other Bamboo outdoor lights from the collection, as was the purpose of the designers; a collection that can create a harmonic lighting setting. Install straight into the ground, suitable for many types of surfaces including concrete.

Driver included: CC - Constant Current 700 mA 100-240V 50/60Hz
