### PRODUCT DESCRIPTION

**Designer:** Ludovica & Roberto Palomba

### Beep LED Wall Light by Foscarini

Designed by Ludovica and Roberto Palomba, the Beep wall light is a versatile, functional and stylish light, made to fit into a wide variety of settings. The body can be rotated a full 360°, allowing you to angle the light where you want, whether you want to create a lighted corner, to put a spotlight on a picture or painting or to simply line the hallway. The wall light has an integrated LED light source which is completely concealed by a white diffuser which spreads the light evenly to create a warm, far-reaching glow.

The lampshade also has an aluminium coloured base which has a small circular opening which lets the light escape. The glow reflects off the wall creating a lovely ambience in the room which also can be controlled by Triac dimming. Available in 2 sizes, the Beep wall lamp is the perfect solution for many spaces and is a handy yet chic light that will add a touch of innovation to the room. An economical and smart choice, useful for many needs.
