## PRODUCT DESCRIPTION

**Designer:** Ruben Saldana

### Tria LED Wall Light by Bover

The Tria LED Wall Light was designed Ruben Saldaña and is a modern choice. The wall light is characterised by its triangular shape which has rounded lines to make it inviting and appealing. The light source then sits behind the solid diffuser, reflecting off the back and the wall to create a round, big illumination that warms up the space.

The Tria LED wall lamp comes in two options: **indoor (O1, 02, 03)** or **outdoor (04 and 05)**. The indoor wall light has an IP rating of 20 whilst the outdoor has an IP rating of 66. The Tria LED Outdoor Wall Light can be used in many outdoor settings in both domestic and professional settings, whether you want to line the walls in a garden, have a welcome home light by the door or to light up an intimate patio. The Tria Indoor LED Wall Light looks beautiful in hallways, kitchens or even in your workspace. It is a great lighting solution for smaller spaces as it takes up little to no room.
