Axolight Kwic Ceiling / Wall

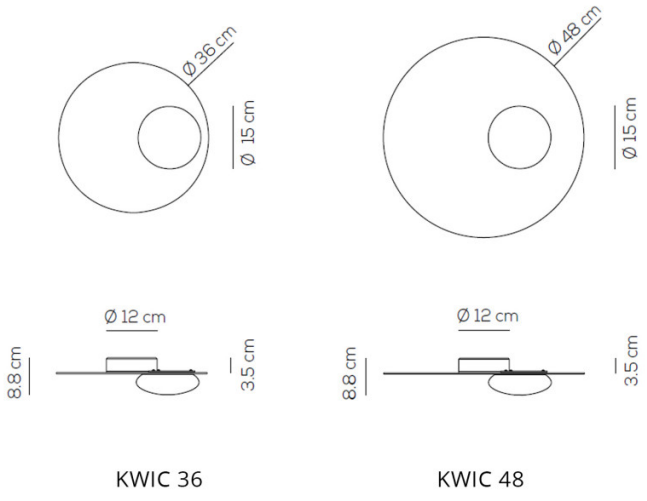

The Kwic Wall/ Ceiling Light is a dynamic, refined collection created by Serge & Robert Cornelissen. The design duo is renowned for the informal elegance portrayed through their products. The Kwic Wall/ Ceiling Light beautifully reflects this approach to design, characterised by asymmetrical lines and graphic geometry. A blown glass diffuser sits off-centre on a circular disk, giving the light its irregular appearance. The painted aluminium disk is available in two sizes and a wide range of finishes, allowing the lamp to blend seamlessly into a range of interiors.

When illuminated, the opal white diffuser creates a bright, warm light, while a delicate glow filters through the back of the frame. This layered lighting adds depth to the Kwic and creates a warm ambience in the room. As the structure sits flush against the surface it's installed on, the Kwic Wall/Ceiling Light is a space-saving lighting solution that can be used in rooms with low ceilings. Display individually, in pairs to frame a doorway, or in rows to line the length of a hallway. For a dynamic installation, create clusters of lights in varying sizes and finishes.

The Kwic Ceiling/ Wall Light is available in 15 bold colourways. Please contact us for more information.

PRODUCT SPECIFICATION

Light Source:	18W, 3000K, 2151 Lumens
IP Code:	20
Dimming:	Dimmable via 1-10v dimming systems. Please consult your electrician, additional wiring may be required on site.
Dimensions:	**Kwic 36** Disk: Ø36cm Diffuser: Ø15cm Height: 8.8cm **Kwic 36** Disk: Ø48cm Diffuser: Ø15cm Height: 8.8cm
