Axolight

Kwic 36 Floor Lamp by Axolight

Refined and dynamic best described the Kwic lights, a design by duo Serge and Robert Cornelissen. The Kwic was success since its launch in 2019, and has earned its place among Axolight's collection. The main feature of the light is a semi-spherical blown glass diffuser, which is placed - at decentralised position - on a circular metal disk. The disk is available in two colour options, intense black or transparent bronze. The bean-shaped glass diffuser is asymmetrically placed on the disk, and as such one back-side is fully illuminated, while the other is not.

Kwic 36 floor lamp will be a centrepiece in your living room, office or business as it is guaranteed to draw all eyes. Even when not in use, Kwic functions as a decorative piece as well. The collection further includes a [suspension light](#) and a [ceiling/wall light](#), each available in the sizes (36 or 48 cm diameter disk) and in the same colour options.

Designer: Serge & Robert Cornelissen

IP Code: 20

Dimming: In line dimmer included on cable

Dimensions:

201 cm height

32 cm width

27 cm depth

Ø 36 cm disk

33.8 cm x 28.8 cm base
