PRODUCT DESCRIPTION

Designer: Axolight Lab

Axolight Ego Ceiling / Wall Light

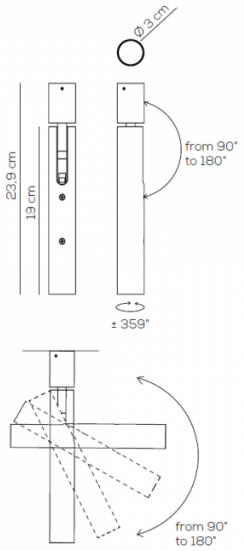

The Ego Wall/ Ceiling Light was designed by the Axolight Lab, a multidisciplinary team that utilises unattainable objects and turns them into designer lighting. The design team have utilised their wealth of experience and creativity to produce an innovative lighting solution that exudes elegance and personality. The body is made from natural brass, untreated by solvents, to allow a natural patina to develop over time.

The Ego can be installed either as a ceiling or a wall light, depending on requirements. The base can tilt from 90° to 180° and rotate up to an impressive 359° to allow users to direct light precisely where required. The integrated LED source emits a warm white light (3000K), perfect for task lighting or to highlight significant art pieces in the home. The impressive beam of light suits use in a kitchen or gallery, while its compact size makes it a space-saving solution that can be installed in multiples to provide a bright, uniform glow.

Please Note: This product uses a remote driver that will need to be housed in the ceiling or wall.

PRODUCT SPECIFICATION

Light Source:	8.8W, 3000K, 1220 Lumens
IP Code:	20
Dimming:	Dimmable via mains phase dimming.
Dimensions:	Max Height: 23.9cm Ø3cm Rotation: 359° Tilt Angle: 90°- 180°
