PRODUCT DESCRIPTION

Bocci 38Vt Table and Wall Light

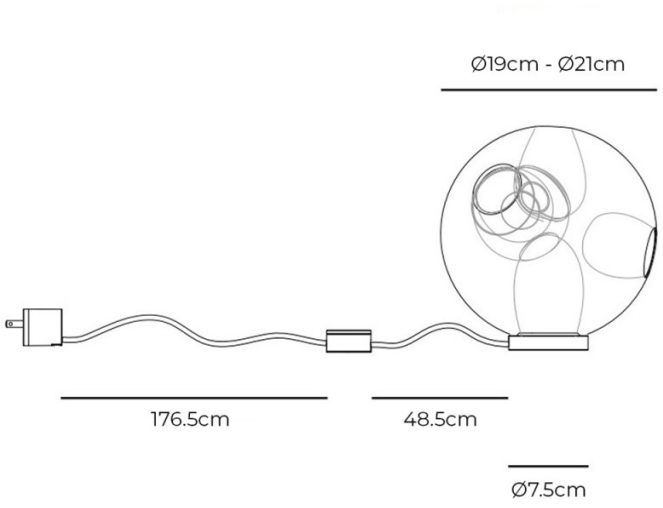

The Bocci 38Vt Table Lamp is a beautiful light made from blown glass and brass. The sphere is made with multiple cavities that are unique and spontaneously finished with a milk white colour. The sphere is clear so you can see the inside, creating a playful and abstract aesthetic. The cavities are designed so you can put plants inside, combining nature and man-made materials. They can be left plain if you want a more minimalist look.

38Vt can be used both as a wall lamp and a table lamp, with a notch on the back of the base and the switch so you can attach it to the wall. The switch opens and closes to turn it on and off and to also dim the light so you can create the ambience you like. This sophisticated wall and table light emits a nice, effective glow that is suitable for many spaces. Add a touch of creativity and natural beauty to your interior with this extraordinary lamp.

Please Note: This light cannot be hard-wired when installed on the wall, so it needs a nearby socket to be plugged in.
