Bocci 84t Table and Wall Light

The 84t Wall and Table Lamp is a beautiful and elegant light that is made from a white glass lampshade with a copper mesh and brass base. The shade is made by blowing glass in the mesh, which creates the effect of the glass pushing through. The final aesthetic makes it look like a bubble has been caught, a soft, pillowed white globe looking delicate and refined surrounded by copper. Each piece also has individuality as the mesh can form and fold in unique ways in each making process.

The Bocci 84t functions both as a wall and a table light, with the base and the switch having a notch on the back so you can attach it to the wall. The simple form makes this table and wall light universal, being useful and decorative in a wide variety of settings. The white glass creates a lovely, diffused glow and, with a dimmer switch, rest assured you can create just the right atmosphere in your space.

Please Note: The Bocci 84t can not be hard-wired when attached to the wall. Therefore it must be installed near a socket so it can be plugged in.

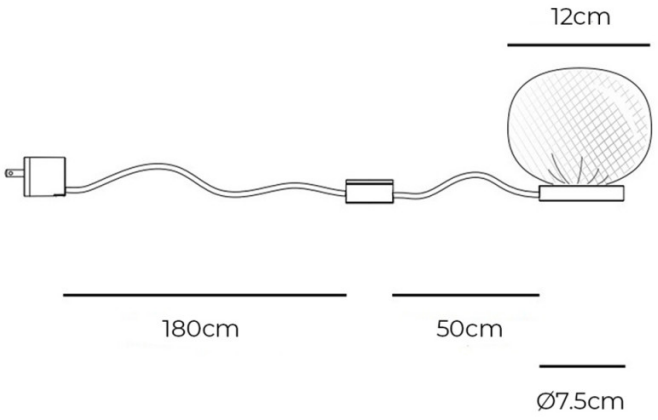

PRODUCT SPECIFICATION

Light Source: 1 x Max 1.8W 2700K G4 LED (Included)
