PRODUCT DESCRIPTION

Designer: Vilhelm Wohlert

Louis Poulsen Wohlert LED Pendant Light

The LED version of the **Wohlert Pendant**, this luminaire was first designed in 1959 by Vilhelm Wohlert. He designed the light after he was challenged by the brand to create a pendant lamp in multiple sizes, which had an easily changeable light source and simple maintenance. Released originally as the Satellite pendant, it is now known as the Wohlert pendant.

The Louis Poulsen Wohlert LED Pendant combines the old design with modern technology to produce a long-lasting light that emits a soft and even glow. The glass lampshade diffuses the integrated LED light source and also has an opening to allow for a downward-directed light, suitable for hanging over tables and surfaces. Available in 2 sizes, this pendant lamp will add a vintage and timeless touch to your interior and is the perfect solution for all your lighting needs.

This pendant has a dim-to-warm function allowing you to dim from 1600K (very warm white) to 3000K (warm white) using mains phase dimming. It is also available to dim using Dali dimming systems or via Bluetooth. Please contact us for more info or to buy these options.

PRODUCT SPECIFICATION

Light Source:	**Small (Ø350)**: 41W, 1600K-3000K, 2955 Lumens **Large (Ø400)**: 41W, 1600K-3000K, 2981 Lumens
