PRODUCT DESCRIPTION

Designer: Hans-Agne Jakobsson

Warm Nordic Fringe Pendant

The Fringe Pendant was designed by Hans-Agne Jakobsson in 1960 and is an iconic piece that harks back to past eras. The pendant is made using brass-plated steel which holds a beautiful fringe that conceals the light source. The fringe hangs down in a graceful and delicate way, creating an elegant aesthetic that will add a classic touch to any interior.

The Fringe Pendant can be used in homes and commercial spaces and will work in any design scheme, whether you have vintage decor or a contemporary setting. The pendant is available in 2 sizes and can be installed in multiples of different sizes at varying heights to create a spectacular display. Alternatively, a single pendant can be displayed for a minimalist effect. A spectacular and timeless piece that will draw the eye in any room.

Please note this pendant lamp can only be fitted with an LED retrofit lightbulb.
