PRODUCT DESCRIPTION

Designer: Joost van Bleiswijk

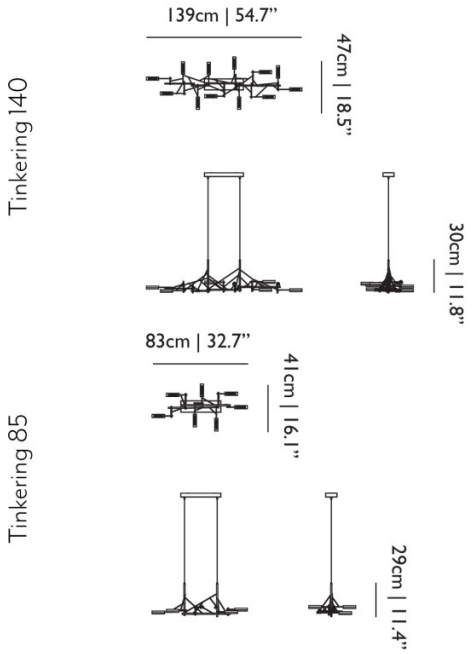

Moooi Tinkering Suspension

The Tinkerking Suspension, designed by Joost van Bleiswijk, is the result of hours spent experimenting with unusual ways to capture and reflect light. The suspension's rhythmic composition is made from black coated stainless steel and brass, creating a clean and luxurious aesthetic. All LED lights are covered by messy coated shades which reflect and guide light into the room. Tinkering is powered by ELECTROSANDWICH® technology, a system that allows multiple LEDs to be used simultaneously with minimal use of wires.

The Tinkerking Suspension was designed not to entirely block the view, giving the suspension a lightweight appearance that doesn't overwhelm the space it inhabits. Each shade is fully adjustable, allowing users to direct light where needed. This adaptable lighting is perfect for illuminating a kitchen counter, dining table, or office desk. With two sizes available, the Tinkering Suspension suits a range of spaces, blending seamlessly into contemporary interiors.

PRODUCT SPECIFICATION

Light Source:	**Tinkering 85:** 10W, 2700K, 420 Lumens **Tinkering 140:** 17W, 2700K, 742 Lumens
