## Eddy LED Table Lamp by Normann Copenhagen

Designed by Simon Legald, the Eddy table lamp is a light of contrasts and balance. The shade is an airy steel circle that is connected to the heavy and organic marble base with a brass ball. The table lamp has an integrated LED light source which is long-lasting which is spread evenly by the lampshade. The shade also has a brass touch dimmer on the top so you can create the atmosphere you want.

The shade can also be rotated so you can direct the light where needed. The Eddy table light is available in 3 colours, black (with black cable), grey (with black cable) and white (with white cable), and can be used in many settings, both in the home and in commercial spaces. Use on tables, desks, side tables, shelves and more, whether you need a reading lamp or an ambient lamp for your interior.

Designer: Simon Legald

IP Code: 20

Dimming: Integrated dimmer on the product
