PRODUCT DESCRIPTION
Designer: Vincent Van Duysen

Oblique LED Table Lamp by Flos

A new 2020 product designed by Vincent Van Duysen, the Oblique LED table lamp is specifically made for work and task purposes. The table lamp has innovative LED and lens technology, which allows the light source to act efficiently and effectively, producing a powerful and useful glow that is perfect for reading and tasks.

The Oblique table light has a minimalist and unique aesthetic, redefining the classic desk lamp to be used by modern users. The table lamp has a touch dimmer on the base and can also be set on a timer so you can have complete control over the light setting. The base also has a handy USB-C port on the back so you can charge compatible devices at the same time. This table light is best used for large projects, offices and for home use, wherever you need a handy task light.

This LED table lamp comes with a cable fitted, however, some images do not show this.
