HAY

HAY Noc Button Wall Light

With a smooth, die cast aluminium surface available in dark grey or off white colours, the Noc Button is a versatile wall light. Suitable for any interior setting, perfect for hospitality or residential settings; the ideal reading light on your bedside or next to your favourite armchair. A rotating mechanism allows you to adjust and direct the light to your desired position, with two points of adjustment. A minimal push button, as its name might give away, allows you to easily switch the light on and off.

Explore the Noc collection by HAY, with the Noc wall light and the Noc Calmp light. The Noc wall is similar with the Noc Button but instead comes with a 2m cable and in-line rocker switch.
