Bocci 38.1V Pendant Light

The 38.1V Pendant is made from glass and uses a glass-blowing technique that has been used by Bocci for many of their lights. The technique creates interior cavities that seem spontaneous and random and have a milk white colour. The cavities can be left empty or can be used to hold plants thanks to their depth, resulting in an interesting and natural aesthetic that will surprise and amaze all who see it.

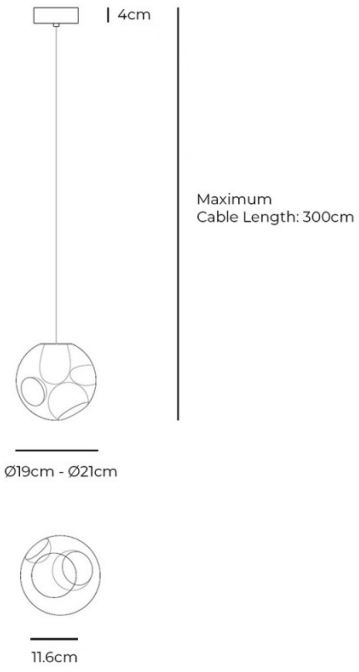

The Bocci 38.1V Pendant Light comes with a light source included, with the choice of either a non-dimmable **LED 1W** bulb or a dimmable **Xenon 10W** bulb. The transparent and white glass diffuses the light bulb to create an inviting and atmospheric glow, perfect for many interiors. Use alone or in multiples in both homes and commercial settings to create an impact and for effective and useful lighting.

This pendant light comes with a deep ceiling canopy but is also available with a shallow or flush mini ceiling canopy. Please contact us for more information and prices.

Please Note: All Bocci Suspension Lights come with a white ceiling canopy as standard. Other finishes are available; please contact us for more information and pricing.
