PRODUCT DESCRIPTION

Designer: Omer Arbel

38.1V Pendant Light by Bocci

The 38.1V pendant is made from glass and uses a glass-blowing technique that has been used by Bocci for many of their lights. The technique creates interior cavities that seem spontaneous and random and have a milk white colour. The cavities can be left empty or can be used to hold plants thanks to their depth.

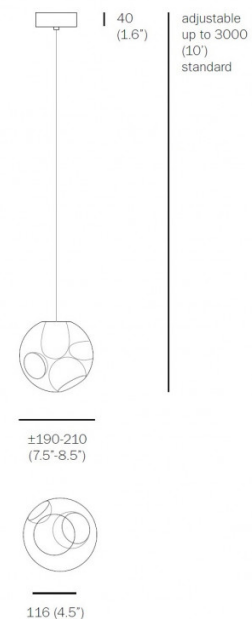

What results is an interesting and natural aesthetic that will surprise and amaze all that see it. The pendant lamp comes with a light source included with the choice of either a non-dimmable **LED 1W** bulb or a dimmable **Xenon 10W** bulb. The transparent and white glass diffuse the light bulb to create an inviting and atmospheric glow, perfect for many interiors. Use alone or in multiple in both homes and commercial settings to create an impact and for effective and useful lighting.

This pendant light comes with a deep ceiling canopy but is also available with a shallow or flush mini ceiling canopy. Please [contact us](#) for more information and prices.

Please Note: All Bocci Suspension Lights come with a white ceiling canopy as standard. Other finishes are available, please [contact us](#) for more information and pricing.
