PRODUCT DESCRIPTION

Designer: Joan Gaspar

Marset Chispa Outdoor LED Portable Table Lamp

Marset Chispa Outdoor LED Portable Table Lamp is a rechargeable IP44 portable lamp by Joan Gaspar, made with a polycarbonate base and an opal polyethylene diffuser. Its form takes reference from a garage lamp, with a protective outer structure around the light source. The result is small, practical, and easy to move between indoor and outdoor spaces.

Chispa can sit on a table, shelf, bedside surface, patio table, or outdoor ledge, and the included hanging accessory allows it to be suspended when a higher light position is more useful. The opal diffuser softens the warm LED light, while the outer structure gives the lamp a more functional look than a standard portable table lamp. It is available in Black, Blue, Green, and Orange finishes, with the black version offering a more restrained option.

The integrated dimmer is built into the body, with three light levels for adjusting the output. Chispa is supplied with a USB-C charging cable, with the power adapter ordered separately, and has a battery life of up to 7 hours at full power, 14 hours at half power, and 28 hours at the lowest setting. Most suited to bedrooms, living rooms, shelves, bedside tables, patios, terraces, garden tables, balconies, restaurants, hotels, and spaces where a small portable light can be moved or hung as needed.

Please Note: As a way to reduce ecological footprint, the Chispa portable light ships with only a USB-C charging cord, which can be used with any USB port to charge the fixture's battery. No wall plug is included. Use a power adapter with the following specifications: 5V DC 1.5A.

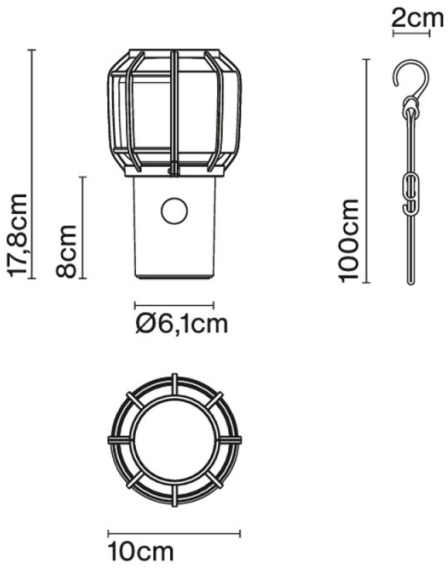

PRODUCT SPECIFICATION

Light Source: 2.7W, 2700K, 120 Lumens

IP Code: 44

Dimming: Integrated dimmer on the product.

Dimensions: Shade: Ø10cm
Height: 17.8cm
Base: Ø6.1cm
Cable Length: 100cm
