PRODUCT DESCRIPTION

Designer: Chia-Ying Lee

Lodes Random Solo LED Pendant

Designer Chia-Ying Lee expands upon her popular Random LED Pendant by offering a solo version of the pendant light. The Random Solo parts from the original three-piece cluster for an individual sphere, giving the illusion of a delicate bubble suspended in mid-air. The sphere diffuser is crafted from blown glass, and is available in five sizes: 12, 14, 18, 23, and 28. The integrated LED light source is housed in silicone at the top of the sphere to provide an even and warm illumination.

The Random Solo pendant is made from blown glass for a delicate and ethereal appearance. This glass diffuser is available in seven elegant finishes: Clear, Frosted White, Glossy Smoke, Pale Gold, Glossy Bronze, Mandarin Orange, and Golden Sage. The wide range of colourways allow for lively combinations when installed in clusters. Alternatively, a single pendant above a table adds a touch of elegance to the room while providing gentle lighting. The frosted white finish features anti-grease properties, perfect for use in a kitchen or restaurant.

The Random Solo Pendant is available to buy as a personalised cluster using a Lodes multiple ceiling canopy. Please contact us for more details and ordering. A Lodes Configurator is available construct and preview your cluster vision.
