### PRODUCT DESCRIPTION

**Designer:** Chia-Ying Lee

### Random Solo LED Pendant Light by Lodes

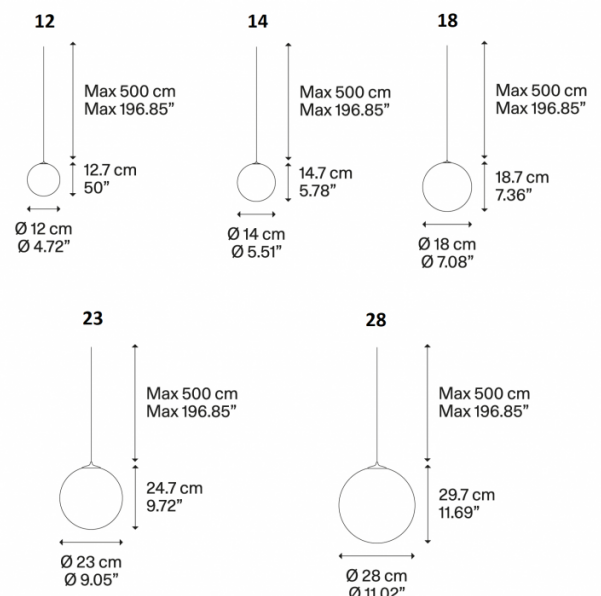

Designer Chia-Ying Lee expands upon their popular [Random LED pendant](#) by offering a solo version of the pendant light, where each sphere sits alone, like a bubble suspended in mid air. The Random Solo pendant lamp comes in 5 sizes, 12, 14, 18, 23 and 28, with each number signifying the diameter of each sphere size.

The Random Solo pendant is made from blown glass using a special technique, so that it appears delicate and ethereal yet metallic at the same time. The frosted white finish is also anti-grease and so is wonderful to use in restaurants, above kitchen islands and in dining areas. The integrated LED light source is housed in silicone at the top of the sphere to provide an even and warm illumination. This pendant light is available with either a 2700K (warmest white) or 3000K (warm white) colour temperature to suit your needs and atmosphere.

**This pendant can be purchased alone for smaller spaces or can be mixed and matched with colour and sizes to create different cluster configurations using a Lodes multiple ceiling canopy. The possibilities of the Random Solo are endless and will look beautiful in any interior!**
