Bonta Portable LED Table Lamp by Artemide

Designed by Davide Oldani & Attila Veress, the Bontà table lamp combines the worlds of food and light with an innovative and unique design. The portable lamp is made from glass, with a milk white diffuser that produces a diffused glow that also directs upwards. The lamp has an opening at the top which holds either a glass bowl or plate, available in 4 colours, which is used for holding food, so people can share and enjoy a meal in a fun and lively way.

With the choice of a bowl or plate in a topaz, turquoise, red or grey colour, you can use the Bontà table light with the bowl or plate inserted for food or not inserted to enjoy as an ambient light. This portable table light comes with an integrated LED light source and has a 3 step dimming function so you can create the right ambience in your space. Use in many interiors for a forward-thinking and functional light that puts importance on a jovial meal time!

Designer: Davide Oldani & Attila Veress
