FLOS

Arco Floor Lamp by Flos

The Arco floor lamp was designed by Achille Castiglioni and his brother, Pier Giacomo in 1962. This iconic lamp is still contemporary looking and has a white-marble base and a satin finish stainless steel telescopic arm producing a unique aesthetic that is eye-catching and innovative. The shade is made from pressed and polished aluminium with a swivelling, adjustable reflector which means you can direct the light exactly where you need.

The Arco floor light is perfect for many settings and can be used as a reading or task light or to create a nice ambience in the room. This floor lamp will look wonderful in lounges, offices, dining rooms and more in the home and also at work to add a classic and modernistic touch.

This classic version of the Flos Arco takes an E27 light bulb with a maximum of 100W. An [integrated LED version of the Flos Arco](#) with a dimmer is also available to purchase online.
