PRODUCT DESCRIPTION

Purity Capsule Table Lamp by Slamp

The Purity Capsule lamp is the modern answer for eliminating dangerous viral and bacteria strains that can exist on our everyday objects and accessories. It has been proven in various studies that these harmful germs can exist on multiple surfaces of different materials for a long time, with the Covid-19 strain being proven to exist for more than 28 days on surfaces, as published in the Virology Journal.

The Purity Capsule table light is the answer to this common problem and health risk. With (UVC a 254)nm technology, the table lamp has been tested and certified to eliminate up to 99.99% of the Sars-Cov2 (Coronavirus strain) and other harmful bacterial strains such as Salmonella, E.Coli and Staphylococcus Aereus in 30 seconds.

It works by placing objects and accessories inside the table light, using the handy coral arms, and then placing the metallized dome over the top. You then press the button located on the base to start the 30 second cleansing cycle. Once the cycle is finished it shuts off, with your objects thoroughly cleansed of all harmful viruses and bacteria!

The dome comes in a silver metallized colour to protect from any harmful rays, making the Purity Capsule completely safe and user-friendly. The base and the handle, however, can be personalised to the customer, with a range of colours and handle shapes available. The base also has a decorative light source that runs independently from the cleansing cycle to provide a warm and soft ambience in your space.
