PRODUCT DESCRIPTION

Designer: Astro Design Team

Astro Trimless Slimline Round Adjustable Fire-Rated Recessed Light

Astro Trimless Slimline Round Adjustable Fire-Rated Recessed Light is a Matt White recessed ceiling light for new ceiling installation before plastering. Once plastered in, it gives a clean, trimless finish while still allowing the light direction to be adjusted after installation.

The adjustable head can be tilted by 30° and rotated through 360°, so the light can be aimed towards a wall, walkway, work surface, or feature. This makes it useful in areas where a small recessed fitting needs more control, such as above kitchen worktops, along a hallway, or in a room where the light needs to be directed after the ceiling has been finished.

The Trimless Slimline Round Adjustable Fire-Rated Recessed Light is wired in, dimmable depending on the lamp selected, and requires no separate driver. It is fire-rated to 30, 60, and 90 minutes for solid joists, with a 30-minute rating for metal web and I-joist installations. This product must be installed before the final plaster skim. Most suited to kitchens, hallways, living rooms, bedrooms, and new ceiling schemes where adjustable recessed lighting is required.
