PRODUCT DESCRIPTION

Designer: Tom Dixon

Tom Dixon Void LED Surface Light

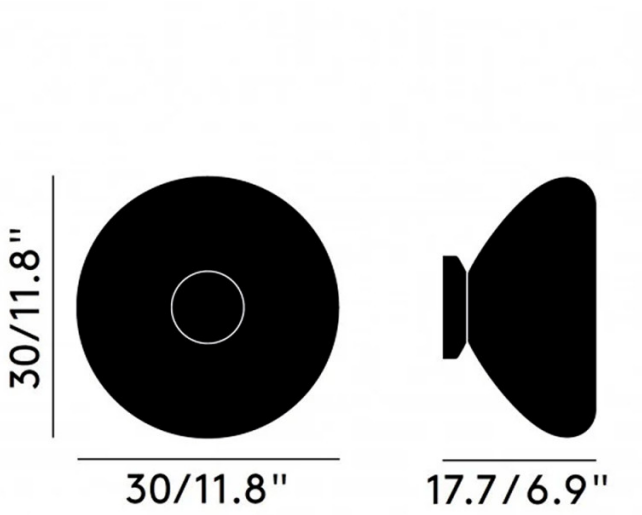

A part of the **Tom Dixon Void Collection**, the Void LED Surface Light is a contemporary diffused lighting solution, which can be installed on both walls and ceilings for a functional and stylish design. The rounded shade is cut from a sheet of pure metal, with each light pressed, spun and then brazed at the end to form a double-walled shade. The high-shine reflectivity achieved with lathing, polishing and caring for base metals is a bold finish that carries across the range.

The Tom Dixon Void LED Surface Light is available in 3 captivating colours, brass, copper and steel which allow it to adapt to various modern interiors, and has an integrated LED light source that is warm and inviting. The illumination emitted from Void is an inviting addition to lounges, dining rooms, offices and many more - creating an intriguing and calming aesthetic.

Please Note: the LED ring of the Tom Dixon Void Surface Light is non-replaceable.
