PRODUCT DESCRIPTION

In Vitro LED Ceiling Light by Flos

Designed by Philippe Starck, the In Vitro ceiling lamp can be used indoors and outdoors and has a minimalist and simple design. A cylindrical metal frame hangs down and interlopes at the bottom to create a geometric aesthetic. The LED integrated light source sits in the top and shines through the glass to create a warm glow.

The In Vitro LED ceiling light is available in 7 colours, white, black, forest green, anthracite, deep brown, pale green and terracotta. You can install in gardens, patios, lounges, conservatories and many more for a clever and stylistic lighting solution. Choose between a 2700K (warmest white) or 3000K (warm white) LED colour temperature.

This ceiling lamp is available in a dimmable version upon request. Please [contact us](#) for more information.
