### PRODUCT DESCRIPTION

**Designer:** Paul Cocksedge

### Gravity LED Chandelier Light by Moooi

Designed by Paul Cocksedge, the Gravity chandelier is an exclusive light made for Moooi. The Gravity light renovates the traditional chandelier by introducing a new material that creates a beautiful arch. The cables are flexible which allows the ropes to hang, creating a classic silhouette whilst also allowing for movement, so you can choose where each branch sits. This makes the Gravity chandelier lamp a truly versatile, innovative and contemporary light.

This lamp is available in 2 versions the Gravity 5, which has 5 light sources, and the Gravity 7, which has 7 light sources. Each lampshade is made from beautiful faceted glass which creates a warming and inviting glow, as the LED source that sits inside twinkles through. The Gravity LED chandelier is a modern masterpiece which can be enjoyed in many settings and will certainly draw the eye in any space.

**Please note** The Moooi Gravity LED Chandelier Light is compatible with the Moooi wireless dimming switch which is available to purchase separately and enables you to dim your Moooi suspension fitting without the need for additional wiring. The Wireless switch comes with a dimmable module that is fitted inside the ceiling canopy of your light. You can then use the switch to dim your Moooi Gravity LED Chandelier to the perfect lumens output. Please [contact us](#) for further information and prices.
